INNOVATIVE ELECTRICAL SOLUTIONS FOR YOUR HOME

Life Is On

CLIPSAL
by Schneider Electric

BRING YOUR HOME TO LIFE

Your home is something special. Like you and your family, it's one of a kind.

At Clipsal by Schneider Electric, we create products and solutions designed to suit every lifestyle. Bringing life to your home, we make living easier, more comfortable and enjoyable for you and your family.

At the same time, we're aware of the need to create technology for a changing world. With ever-increasing stresses on the environment, it's important to harness and use energy in a safe, efficient and sustainable manner. Within this magazine you'll find a range of ideas and products that have been designed to enrich your life in an environmentally conscious way.

Starting here is the perfect way to begin thinking about how the right products can transform your home. Inside these pages you'll find:

- Pre-planning advice, support and tools to help you prepare for your home renovation or new build;
- Room-by-room inspiration and guidance showing how you can enhance every room of your home;

- Specific advice for achieving energy efficiency, reliability and safety, connectivity and home automation;
- A comprehensive selection of products including; switches, power outlets, lighting, ceiling fans, air movement, bathroom heating and smart home control options.

You can also discover more with Clipsal At Home online, clipsal.com/athome.

Here you'll find:

- Expert advice from Australian stylists, showcasing upcoming trends and opinions on home electrical;
- Easy to view product styles and colour options;

- Product brochures;
- An electrician locator to help you find a licensed electrician in your area to install your favourite products;
- Assistance in finding local electrical suppliers and where you can purchase products.

Welcome to Clipsal At Home.

PLANNING AND BUDGET

Planning your home electrical can seem a daunting task, and when building or renovating, it is often something that gets left until the last minute, or even forgotten about all together.

For such a critical and individual component of any home, electrical planning requires considered thought. While your electrician is wonderful for providing guidance and advice, customising your home to your wants and needs, all while meeting your budget, demands personal involvement in the planning process.

No matter where you are in your home building or renovating journey, Clipsal has the tools and services that make this process not just easy, but enjoyable. So whether you're looking for inspiration or advice, it's time to get planning.

INSPIRATION AND DESIGN

Clipsal At Home Online: With inspiration and electrical planning ideas, Clipsal At Home is perfect if you're in the research phase of your renovation or new build project. With everything from expert advice from Australian stylists, to directories of local electricians and suppliers, you will find the latest trends, hottest products and invaluable guidance to help create your dream home.

Get inspired, clipsal.com/athome

Clipsal iSelect: Free to download, Clipsal iSelect is an interactive app that helps you plan your home room-by-room. Simply upload a photo and then select, move and resize your favourite products to see how they look in your home. You can even view your selections in real time, in 3D, using the Real Time Visualiser. For feedback and inspiration, share the images you create on Facebook. Once you're happy with your selections, you can create an itemised list of your chosen products to show your builder or electrician.

Start designing at clipsal.com/iselect

PLANNING AND ADVICE

Clipsal Wishlist: This handy web tool lets you create a home electrical plan exactly how you want, when you want, unique to your lifestyle and budget. From an itemised pricing list, to a huge range of electrical solutions and a convenient Electrician Locator – Clipsal Wishlist empowers you to plan. And you can do it all from your tablet, laptop or desktop computer.

Simply select the products and packages you want and add them to the floorplan of your home. Answering all your building and renovating questions, and even providing recommendations based on your personal profile, Clipsal Wishlist empowers you to plan from the comfort of your home, when you want, how you want.

Create your unique plan, wishlist.clipsal.com

Clipsal Clipspec Consultations: If you require a little help to design your complete home electrical plan, then a Clipspec consultation is ideal for you. Combining software and expert advice, a Clipspec consultation ensures your home is smart in energy and convenience with home automation products and lighting estimation. Not only will you have the opportunity to see and feel the Clipsal products you love, but you will also leave with a customised electrical plan that matches your home and lifestyle.

Available exclusively through participating builders and your local Clipsal Powerhouse, Clipspec consultations are free when referred by a participating Clipspec builder*. Remote consultations are also available over the internet or phone** if you do not live near a Clipsal Powerhouse.

* Fee applies if you're not referred by a participating builder, no appointment required.
**ADSL2+ connection is required for phone consultation.

Appointments are required, so for expert advice, make an appointment with a Clipspec consultant today: clipsal.com/clipspec

Clipsal SILC
 This simple, intelligent lighting and control system gives you complete control of every connected LED downlight in your home, all from your smartphone or tablet, and wall switches too.

Infrascan® Outdoor Motion Sensor
 Welcome guests or ward off intruders. The Infrascan automatically turns lights on and off upon movement and is available with remote control and holiday function for peace of mind while you're away.

Exterior Lighting
 Customisable and adaptable to suit your home, our outdoor lighting range is available in round, rectangular or square designs along with additional colour options.

Complete Home Security
 Ensure the safety of you and your family. If there is an intrusion, this system will alert a monitoring station. It can even be directed to your mobile phone and integrated with C-Bus home automation systems.

C-Bus Touch Screen Controllers
 Personalise your home with this truly adaptable home automation system – the applications are almost limitless.

C-Bus eDLT Wall Switch
 Home control should be both simple and sophisticated. With a customisable display and contemporary design, the C-Bus eDLT wall switch not only provides user-friendly control of your C-Bus system, but also complements any modern interior.

Surveillance Camera
 See who's knocking at your door in comfort and safety. For added convenience you can connect your cameras to your TV.

Saturn Zen Switches and Pictogram Icons
 With Saturn Zen pictogram icons, you can identify which switch does what, at a glance. With standard LED push-button switches, Saturn Zen makes it easy to identify and turn on lights even at night.

ENTRANCE

Clipsal welcomes you home to your safe and secure little haven.

ROOM TIP

Create a truly welcoming feel to your home by installing an indoor motion sensor in your entrance - switching your interior lights on the minute you walk in the door.

Visit
clipsal.com/athome
for more
inspiration.

Flush-Mount Smoke Alarm
Protect your family, home and possessions with our flush-mount smoke alarm. With an unobtrusive design it is perfect for modern, contemporary interiors.

LED Downlights
Save on electricity with LED downlights. Compared to traditional low voltage downlights, LED lamps cost less to maintain and can last up to 30,000 hours.

Ceiling Sweep Fans
Stay cool in summer and circulate warm air in winter. Ceiling sweep fans are a great addition to help reduce costly cooling and heating bills.

Saturn Push-Button Dimmer Switches
Reduce visual clutter on the wall by incorporating on/off switching with dimming control. Available in a wide range of styles and colours, they're perfect for any home interior.

Strato Module Combinations
Design your home to suit your needs with Strato's custom switch configuration. From switches and dimmers, to audio-visual and data outlets, the possibilities are endless.

StarServe Digital Home Networking
StarServe lets you access Pay TV and digital subscription services from any TV outlet in your home, giving you the flexibility and accessibility to suit your lifestyle.

USB Wall Charger
A simple and convenient way to charge up to three electronic devices, at the same time, per switch plate. You'll be back using your mobile devices faster than ever.

Bluetooth™ Home Audio
Listen to what you want, where you want with the benefits of Bluetooth connectivity. You can connect to your Bluetooth speakers via your iPod, tablet, or any other Bluetooth enabled device.

FAMILY ROOM

A flexible lifestyle needs an adaptable electrical and lighting scheme.

ROOM TIP

Say goodbye to expensive energy bills by monitoring your energy consumption with the Wiser Link Energy Management System.

Visit clipsal.com/athome for more inspiration.

KITCHEN

It's the hardest working room in the house, but you should still be able to take it easy.

ROOM TIP

Get cooking with no restrictions. Install a quad power outlet in your kitchen so you can use multiple appliances at once.

Twin Power Outlet with an Extra Removable Switch

Take control with this power outlet. The extra switch can be used to turn on a separate circuit to control fans, lighting and cookers.

LED Downlights

Make kitchen prep easier by lighting work areas with these low-profile downlights. You can also use them to enhance features such as glass splash backs and bench tops.

Ceiling Exhaust Fan

Ensure kitchen ventilation with these low-profile, fly proof, ceiling exhaust fans. The grille is dishwasher safe to ensure easy cleaning.

Infrascan® Indoor Motion Sensor

Make finding ingredients easier. Perfect for pantries, these motion sensors switch lighting on and off automatically for your convenience when you have your hands full.

Saturn Zen Smart Shelf and USB Charger

Designed to hold two smartphones or one tablet, the Smart Shelf is perfect for the kitchen. Reducing clutter while keeping your devices charged, you can even use the Smart Shelf as a recipe stand for your smart device.

C-Bus Touch Screen Controllers

Streamline your home with the C-Bus Touch Screen Controller and control your C-Bus system from one central location.

Saturn Wall Switches

Wall switches should enhance your home interior. Choose a wall switch that complements your style with this diverse selection.

Pop-Up Power Outlet

You won't believe something so functional can be so stylish. Great for bench tops, these ceramic pop-up power outlets feature a flush, compact design. Say goodbye to messy cords and no access to power!

Visit
clipsal.com/athome
for more
inspiration.

HOME THEATRE

When everything is working perfectly behind the scenes, you can concentrate on the big picture.

ROOM TIP

Install surge protected power outlets in your home theatre so you can sit back and relax, knowing your valuable electronic devices are safe from damage.

C-Bus Multi-Room Audio (MRA)

For the ultimate cinema experience, you need crisp, clear sound. Incorporate it in your C-Bus system and you can enjoy this clarity anywhere in your home.

StarServe Digital Home Networking

StarServe lets you access Pay TV and digital subscription services from any TV outlet in your home, so you can watch what you want, wherever you want.

Clipsal SILC

Dim the lighting in your home theatre room to provide the perfect movie atmosphere. Clipsal SILC makes this easy via a smart device, through control of connected LED lighting.

LED Dimmer

Bring the cinema experience home with the LED dimmer and dimmable LED lights.

Powerainment

Free your home theatre of clutter. Powerainment is a simple solution that can be configured to suit your power and viewing requirements. Pay TV, free to air and DVD players can all be powered from one source.

Bluetooth™ Home Audio

Bring your movies to life with the benefits of Bluetooth connectivity. You can connect to your Bluetooth speakers via your iPod, tablet, or any other Bluetooth enabled device.

C-Bus eDLT Wall Switch

Activate a movie experience when you walk into the room. With just the push of a button your home theatre could dim the lights, turn on the projector and lower the screen.

Professional Bluetooth™ Audio Receiver

Does your family disagree about what music to play? With our Professional Bluetooth Audio Receiver you can listen to one thing in your home theatre whilst something else plays in other rooms.

Visit
clipsal.com/athome
for more
inspiration.

StarServe Data Home Networking
Enjoy the flexibility of networked computers, printers, scanners and gaming with internet, telephone, fax and data to any room in your home.

Saturn Zen Smart Shelf and USB Charger
Avoid clutter on your desk with the Smart Shelf. Designed to hold two smartphones or one tablet, it keeps your devices out of the way when charging.

Modena USB Input/Data/HDMI Outlet
Forget having to search for the right outlet for each of your office devices. The Modena range caters for all applications and is available in a wide range of configurations.

Surge Protected Power Outlet
Relax knowing your valuable office equipment is safe with this surge protected power outlet.

LED Downlights
Enhance your productivity by positioning LED downlights above your desk – ensuring your workspace is properly lit.

Impress Push-Button Switches
Complement your home office with the sleek and streamlined design. These switches can be added to Slimline, Classic, Standard and Metal Plate ranges and have an LED option.

Bluetooth™ Home Audio
Listen to what you want, where you want – including in your study or home office – with the benefits of Bluetooth connectivity.

OptiLine 50 Furniture Box
The pull-up furniture box reduces clutter by allowing access to power, data, USB chargers, HDMI and telephone, even when completely flush. Elegant and modern, they are a must have in any home office.

HOME OFFICE

When your electrical layout and lighting excel at their job, it's easier to get on with yours.

ROOM TIP

Protect the important documents in your home office with a smoke alarm. With early warning you will have extra time to save your irreplaceable possessions.

Visit clipsal.com/athome for more inspiration.

BEDROOM

Lighting, temperature and mood can help create the bedroom of your dreams.

ROOM TIP

Acting as both a charger and a shelf, install a Saturn Zen Smart Shelf and USB Charger by your bed for easy access to your electronic devices, even while they're charging.

LED Downlights

Ambience without inefficiency – when used with dimmers, you can create the perfect ambient lighting while enjoying even greater energy savings.

Strato Wall Switches

Brighten up your life by adding colour to your wall switches. With a huge selection of colours, there is sure to be an option to suit your style.

Ceiling Sweep Fan

Assist ventilation and maintain a comfortable sleeping temperature by installing a ceiling fan with convenient remote control.

Rotary Universal Dimmer

Reduce visual clutter by incorporating on/off switching and dimming into one rotary control.

Infrascan® Indoor Motion Sensor

Control the lights in your walk-in robe, even with your hands full. These sensors also help ensure your lights are never left on by mistake.

C-Bus Desktop Touch Screen Controller

Control your C-Bus system from the comfort of your bed. Music, curtains, temperature, lighting, fans and more – it can even be used as an alarm clock.

Flush-Mount Smoke Alarm

Heard but not seen. Sleep soundly knowing you have the protection of an audible early warning system from your Clipsal smoke alarm.

Multi-Room Audio

Enjoy your favourite music, wherever you are. This system provides the flexibility to distribute audio throughout your entire home, with complete control.

Visit clipsal.com/athome for more inspiration.

BATHROOM

Whether you're looking for a relaxing space or to get ready with pace, enjoy a practical, comfortable and safe bathroom.

ROOM TIP

Convenient and energy saving, install a timer switch in your bathroom and never leave your lights or heaters on again.

Bathroom Fan/Light/Heater
Turn your bathroom into an oasis of warmth and light, without the excess moisture or steam.

Ceiling Exhaust Fan
Remove moisture and steam without added heat. Fitted with a backdraught shutter, this unit prevents air entering and escaping when not in use.

Power Outlets
With so many electrical appliances, it's important to have enough power outlets in your bathroom. An optional exhaust fan switch is also available.

Saturn Zen Switch Plate with Light/Fan/Heat Pictograms
Never forget which switch does what, with these handy pictograms. Choose from up to 50 optional LED pictogram icons to easily recognise the right switch at a glance.

LED Downlights
Save on maintenance with these LED lamps, featuring a lifespan of up to 30,000 hours. Subtle and functional, install them above your vanity to help you with everyday tasks.

Infrascan® Indoor Motion Sensor
Ideal for use in a separate toilet, the Infrascan works as a hands-free light switch and is perfect for those middle of the night trips.

Wall Switches
A switch should complement the rest of your bathroom décor. With LED and push-button switches, glass looks and labels, there's something to suit every style.

Bluetooth™ Home Audio
Listen to your favourite tunes in the bathroom with the benefits of Bluetooth connectivity.

Visit clipsal.com/athome for more inspiration.

LAUNDRY

Laundry may not be your favourite task but a few extra accessories can make it a little easier.

ROOM TIP

Get your laundry done faster by customising your electrical solutions to meet your needs – book a Clipspec consultation to create a personalised plan.

Quad Power Outlets

A modern laundry accommodates more appliances than just a washing machine and dryer. Ensure you have enough power outlets for all your requirements.

Window/Wall Exhaust

Keep your laundry dry and clean and remove moist air with a window or wall exhaust fan.

In-Line Ducted Exhaust Fan

Does your laundry lack access to a ceiling cavity? Remove damp air and prevent damage to your property with these fans. With an optional gravity shutter, you can also prevent unwanted draughts and insects when not in use.

Circular LED Ceiling Light

This light provides a perfect lighting solution, without compromising the style of your home.

Timer Switches

Save on electricity bills with switches that turn off lighting and exhaust fans after a preset period of time. Simply turn it on and the timer switch will do the rest.

Residual Current Device (RCD) Protected Safety Switch

Ensure your laundry is safe by protecting your family from faulty appliances or accidents involving water.

Infrascan® Motion Sensor

With arms full of laundry, struggling to reach the switch is impossible. With motion sensor lighting, the light simply turns on when you enter the room and turns off when you leave.

Saturn Zen Switch Plate with Pictogram Icons

Multiple switches can be confusing, but with Saturn Zen pictogram icons you can easily identify your light switch, exhaust fan or outdoor light above your clothes line.

Visit clipsal.com/athome for more inspiration.

Weatherproof Power Outlets
Whatever home improvement you are tackling, these weatherproof power outlets provide you with convenience and peace of mind.

Weatherproof Switches
The safest option for operating garage lighting, these waterproof switches are designed specifically for areas exposed to dust or liquids.

Conext™ RL Solar Inverter
With high efficiency and performance, our solar inverters ensure your investment in a solar system is repaid as quickly as possible.

Suspended Pendant Power Outlet
Work freely with a power source that can be suspended directly over, or near, your work area.

Surface or Flush-Mounted Switchboard
Compact and convenient, this switchboard is designed to take up as little space as possible while making it easy to reset your safety switches or circuit breakers.

Infrascan® Motion Sensor with LED Floodlight
Light up your shed automatically using the Infrascan sensor. Providing superior illumination, whilst being extremely energy efficient, you will save on expensive electricity bills.

Portable RCD (Safety Switch) Protected Power Outlet
A safe and flexible power solution, this portable power outlet is ideal for use with power tools in outdoor areas.

RCD (Safety Switch) Protected Extension Leads
Providing you with safe power anywhere in your home, these extension leads are available in 2m and 10m lengths.

GARAGE & SHED

From a home workshop to a place to store your dream machine, the electrical design for a modern garage needs to be functional and practical.

ROOM TIP

Install a motion sensor in your garage so that when you arrive home you can exit your car safely, without having to search for the light switch.

Visit clipsal.com/athome for more inspiration.

OUTDOOR LIVING

Whether entertaining or relaxing, enjoy the comforts of the great indoors, outdoors.

ROOM TIP

Make entertaining after dark easy. Install a Clipsal Slimline Floodlight to your backyard, swimming pool, or outdoor living area.

Pool and Spa Timer

Enjoy the convenience and energy savings of a pool and spa timer. They can be easily programmed around frequency of use to suit the season.

Weatherproof Power Outlets

Avoid the possibility of tripping on an extension cord with Clipsal Weatherproof Power Outlets in your outdoor area.

Sunset Switch

A convenient exterior lighting solution, Sunset Switches activate outdoor lighting at dusk and automatically switch off after a preset period, or at dawn.

Weatherproof Outdoor Switch

Give yourself peace of mind and protection from rain and dust with our IP Rated Weatherproof Outdoor Switches.

Premium Outdoor Light

Perfect for illuminating under eaves or down the side of the house. With numerous colours and styles to choose from, there's one to suit your home.

Ceiling Sweep Fan

Keep yourself cool on hot days and muggy nights with these verandah and pergola appropriate fans.

Bluetooth™ Home Audio

Entertain friends outdoors with your favourite music. Enjoy the benefits of Bluetooth connectivity and crisp, clear audio.

Motion Sensor with LED Floodlight

Light your outdoor areas without wasting electricity with these efficient, timed motion sensitive LED floodlights.

GET SMART

Streamline your life with a home of the future – intuitive, automated and connected.

Enjoy superior comfort, convenience and energy savings through the intelligent control of lighting and electrical devices.

Automating your home with smart home technology can be as simple as installing a single motion sensor, dimmer, or timer, or as advanced as integrating multiple home technologies into an intelligent control system.

With control via smart devices, the possibilities are endless.

Benefits of a Smart Home

No matter what level of automation you choose, you and your family will enjoy a whole range of exciting benefits.

Comfort:
Lights, entertainment, audio and climate. Dramatically alter the ambience of any room with the push of a button, giving you more time to sit back and enjoy it.

Convenience:
Streamlining your everyday life by automating routine functions, smart home technology creates a self-sufficient environment, saving you time to do more of what you want.

Control:
Configure your home to suit your lifestyle. Whether you're just after basic control or are looking to invest in whole home integration, smart home technology greatly improves the usability and functionality of any home.

Energy Efficiency:
Smart home technology allows you to use the energy in your home more efficiently. Providing information about how much energy you're using, smart home technology makes it easy to make real time changes to your consumption.

Security:
With options to integrate your security system, smart home technology provides greater safety and peace of mind by alerting you to what's going on with your security system, no matter where you are.

Future Proof:
As smart home technology becomes more and more prevalent, properly wiring your home allows you to easily accommodate and incorporate advances in technology.

Add Value:
An investment in smart home technology can add value to your home. With a multitude of lifestyle benefits, smart homes are attractive to future buyers.

Planning Your Smart Home

“Smart Home” might sound intimidating but with the right planning and advice, creating the right system for you and your family is easy.

Easily customisable to suit you and your lifestyle, when deciding what to include in your home control system it's important to consider the following:

Budget:

Smart homes are scalable to your budget and needs. No matter what level of smart you choose, you'll enjoy the benefits.

Control:

The scope of smart home technology is extensive, from basic control to whole home integration. By determining what elements of your home you wish to control and how, you can decide what level of home automation is right for you.

Layout:

Once you've worked out what elements you want to control, it's important to consider which areas of the home you want to have this control. For instance, if you wish to implement multi-room audio, you will need to decide which rooms you want it to play in.

Functionality:

The level of functionality you require will impact the type of networking and connectivity you need in your home.

Structured Cabling:

- Delivers data, video and digital signals throughout your home.
- Suited to new homes or renovations.
- Performance standards guarantee faster, more reliable speed and signal consistency.

Wireless Technology:

- Perfect for the everyday use of computers, mobile and tablet devices.
- Suited to older homes or rentals.
- Can have bandwidth limitations that result in poorer transmission quality and interference.

CLIPSAL TIP

To get the most out of any smart home, it's important to speak to an expert. Your electrician or builder should be able to help with most installations, or, for more complex installations, a Clipsal Systems Integrator can provide you with the advice you need. For a list of local System Integrators, contact Clipsal Consumer Support on 1300 669 925.

Levels of Smart

Choose what you want to control in your home. Whether it's individual control, or a fully integrated system, there's something to suit your lifestyle and budget.

What You Can Control:

- Lighting
- AV/Entertainment
- Audio
- Ceiling Sweep Fans
- Windows, Curtains and Blinds
- Irrigation
- Climate
- Energy Management
- Security/Intercom
- Access control
- Pool and Spa

Smart Home Solutions

Having a smart home doesn't need to be expensive or extensive. With a range of scalable options, Clipsal makes smart living accessible to everyone.

BASIC:

Infrascan® Motion Sensors:

Automatically turning lights on when you enter an area, and off again after a pre-determined time without movement, Infrascan Motion Sensors allow you to save energy by never accidentally leaving the lights on again. Outdoor models are available with a weatherproof housing.

Sunset Switches:

Sunset Switches automatically switch lighting devices (such as garden lighting) on at dusk and off at dawn, or after a preset time has elapsed.

Timers:

Clipsal's Timer Switches provide precise control of services and are ideal for use with exhaust fans, pantry lights, garage lighting and heaters. Switchboard mounted timers for pools, spas and irrigation systems are also available.

Dimmers:

Most of the time you don't need to set your lights at full brightness to light a room. With dimmers installed, you can have complete control over the level of light in your room. To create a little ambience, you can dim the lights to a more desirable level.

Push Controls

MODERATE:

Bluetooth™ Home Audio:

Clipsal Bluetooth Home Audio combines the benefits of Bluetooth connectivity and crisp, clear audio. With control from your smartphone, tablet, or other Bluetooth enabled device, you can listen to what you want, anywhere in your home.

Clipsal SILC:

Increase your home's IQ with Simple Intelligent Lighting Control from Clipsal. In addition to conventional wall switches, this home lighting system gives you complete control of connected LED downlights in your home from your smartphone or tablet. Group rooms or areas of the house, dim or brighten individual lights, or turn everything off with a master switch.

Wiser Link:

Monitor your energy consumption via a smart device with the Wiser Link system. Providing data about your usage of heating, hot water, lighting and cooling, you receive notifications when there is a power outage in your home, your critical appliance (fridge, swimming pool, aquarium etc.) has no power, or you spend more than your monthly energy goal. With the Wiser Link app, you can even stay connected with your home when you're away.

ADVANCED:

Push Controls:

An intuitive, affordable and scalable control system, Push creates a seamless and connected home. Push brings the control of your home's devices, systems and appliances (irrespective of brand) to one easy-to-use device, giving you the ability to control lighting, audio visual, climate, security, blinds, multi-media and energy management. This means you can operate your home technology with just the push of a button, giving you greater connectivity, simplicity, comfort and control in the home.

ULTIMATE:

C-Bus Home Control:

Perfect for new home builds and major renovations, this allows you to enhance your lifestyle by combining today's modern technology with the benefits of C-Bus Home Control. Customisable to suit your home and lifestyle, the C-Bus system is designed so that your whole family can use it.

You can control your C-Bus system from an extensive range of touch screens, eDLTs and other wall switches that blend in with your home and complement your décor.

C-Bus gives you the ability to control lighting, irrigation, air conditioning, multi-room audio, windows and blinds, home theatre, home security, keyless entry, and more. For the ultimate automation experience, you can incorporate elements into scenes or schedules. This means you can program individual elements to work in unison at the touch of a button. This function allows a specific mood or atmosphere to be created quickly and easily.

Wiser™ Home Control:

Whether you're outside, inside, or away from your home, Wiser Home Control delivers access to your C-Bus Home Control system via web-enabled devices, such as a smartphone, laptop, tablet or PC. This makes accessing and using the technology in your home easier and more convenient, giving you a whole new level of functionality and connectivity.

SAFETY AND PROTECTION

Protect your family and keep your home and possessions safe, so you can enjoy life, worry free.

Do you know what happens inside your electrical switchboard?

Whilst your electrician can help you solve any problems, having a basic understanding of how everything works is an important step in electrical safety.

The following information is intended as a general guide; for personalised advice, we recommend talking to our Consumer Support Team on 1300 669 925 or online at clipsal.com

3 Steps to Complete Electrical Protection

Step 1: Safety Switch (RCD) – Protect Your Family

In the case of faulty appliances or wiring, a safety switch disconnects the power to save you from a potentially fatal electric shock.

Step 2: Circuit Breakers – Protect Your Home

In new homes it's a legal requirement to install miniature circuit breakers (MCBs) and safety switches. MCBs protect cables from damage in the event that they overload and short circuit. This prevents overheating, eliminating the risk of fire.

Step 3: Surge Protection – Protect Your Possessions

Lightning strikes, power surges and voltage spikes can destroy your electronic equipment in an instant. Switchboard mounted surge protection devices (overvoltage protection) prevent surges entering your home.

CLIPSAL TIPS

For a space saving solution that gives you high performance circuit protection, consider a Residual Current Breaker with Overload (RCBO). Discover more at clipsal.com/resimaxprotection

Is Clipsal keeping your family and home safe? Look for the Clipsal brand in your electrical switchboard.

Each year in Australia there are over 10,000 house fires, resulting in death, injury and millions of dollars worth of property damage. Stay safe with smoke alarms – a requirement in every home.

When you're asleep, you lose your sense of smell. That means, in the event of a fire, the smell of smoke won't wake you. That's why it's essential for every home to be fitted with a sufficient number of appropriate, and suitably placed, mains powered smoke alarms.

Clipsal recommends the installation of multiple smoke alarms in your home and suggests talking to your electrician about the merits of interconnecting them. If the sound of an alarm will not be enough to alert you, it's also worth considering installing a 756 Isolation Unit to activate lights.

Fire Departments and Clipsal recommend photoelectric smoke alarms, which have a faster response to smouldering fires, the most common in domestic homes.

Product Care and Maintenance

While homes are made to last, some elements of the home require maintenance and replacement every now and then. Some of the most commonly used elements in the home, power outlets and light switches, withstand years of repetitive use, but over time, they can begin to deteriorate.

Damaged power outlets or light switches can present a potential safety concern for you and your family and they should not be ignored. If you notice electrical damage in your

home, you should contact a licensed electrician immediately.

Smoke alarms also require regular maintenance. We recommend that you test your smoke alarm battery once a month and replace batteries once a year. All smoke alarms (regardless of manufacturer) have a limited service life, so your smoke alarms units should be replaced every 10 years.

For more information visit clipsal.com/care

CLIPSAL FACT

Fifty cents from the sale of every Clipsal Firetek smoke alarm is donated to the Julian Burton Burns Trust, to help support their work of alleviating the pain of burns patients around Australia. Discover more at clipsal.com/burnstrust

LIGHTING

Live brighter when you choose the right lighting for your home.

Lighting has the power to transform a room, showcase your interiors, and create the perfect ambience. How? Find out here.

Layer Your Lighting

There are many different types of lighting, so when creating your lighting plan, it's important to consider the functionality you wish to achieve.

- **Ambient lighting** provides an area with overall illumination and is fundamental to a good lighting plan.
- **Task lighting** highlights a specific area of a room where a visual activity will take place, for example food preparation in the kitchen.
- **Accent lighting** focuses on particular features of the home and adds drama to a room by creating visual interest.
- **Decorative lighting** is used as the focal point of a room to enhance the interior styling.

Set the Mood

Different light can have very different effects on a room's atmosphere.

Warm white light creates a soft, relaxed and comfortable atmosphere suitable for bedrooms or living areas, whilst cool white light is much brighter and bolder, suitable for active areas such as the kitchen or laundry.

Enjoy the Benefits

Energy efficient and eco-friendly, LED lighting is a great alternative to your standard or halogen lights.

Get to know the benefits of LED:

- **Energy Efficient:** Uses up to 80% less energy.
- **Cost Effective:** Long lifespan of up to 30,000 hours.
- **Fast Switching:** Switch on and off instantly – no fading or flickering.
- **Dimmer Compatibility:** Greater control over your light levels.
- **Superior Safety and Protection:** Reduced fire risk.

AIM FOR THE STARS

Enrich your life in an eco-friendly way.

If you're building a new home or undertaking a major renovation, the Building Code of Australia (BCA) specifies that you must achieve a minimum 6-star energy rating.

To do this, you need to meet a set of energy efficiency requirements including:

- Having adequate ventilation and air movement;
- Using renewable energy sources; and
- Implementing measures to reduce heating and cooling loads.

With an extensive range of energy efficient products, Clipsal can help you on your way to a 6-star rating.

LED Downlights: Incredibly energy efficient, Clipsal's range of LED downlights have a 62lm/W rating, exceeding the required standard of 40 lm/W.

Dimmers: Most of the time we don't need to set our lights at full brightness to light a room. By dimming your lights, you not only set the mood of the room, but also use less energy.

Infrascan® Motion Sensors: Providing energy savings, lights turn on automatically when movement is detected and off again after a pre-set period of time.

Sunset Switches: Control your perimeter lighting with a sunset switch – using a light sensor to switch lights on as daylight levels drop and back off at sunrise.

Timers: Prevent excess energy consumption with an indoor or outdoor timer switch.

Ceiling Sweep Fans: A great low cost method of cooling your home in summer and circulating warm air in winter.

Solar Inverter: Optimise your solar system's performance by choosing the Conext RL, specifically designed for a variety of residential applications.

Find out more about how the BCA requirements affect your home project by contacting our Consumer Support Team on 1300 669 925 or online at clipsal.com

TIME TO MAKE THE SWITCH

Whether you're looking for bold and bright, minimalistic and sleek, or classically understated, Clipsal has the switch for you.

When building or renovating, most people focus on the big picture – paint colours, carpeting, tiling and more. But, it's the finer details that set the best homes apart.

More than just wiring and layout, your electrical installation has a huge impact on the overall look and feel of your home. So, it's time to forget your standard white plastic switches and dress your home with sophisticated switches that complement your style.

With a variety of modern finishes, styles and colour options, Clipsal has the switch to fit your need and budget.

The following pages highlight a selection of our extensive range of products.

ROOM RECIPES

An important design element in every room, discover how your electrical accessories can work together with the other features of your home to create a cohesive, stylish environment.

Based on a decorator's mood board, these Room Recipes present the ingredients for creating the perfect space, showing you the versatility of Clipsal products and how you

can use them in your home – no matter what your personal style. Showing how hard items can work alongside softer items, each Room Recipe delivers, at a glance, an immediate sense of

how your room can look and feel. A useful tool to trigger beautiful ideas, use these Room Recipes for inspiration when creating your own home interiors.

PRIMARY COLOURS

Arriba! Arriba! A spirited lounge room with highlights of primary reds, greens and mustards takes Strato's amazing switch-out plates to the next level.

If you're looking for something more subtle, these primaries also work well against a neutral palette, where the delicate backdrop allows their true colours to shine.

PASTELS

Weekenders deserve the same level of comfort and style as a primary residence. The Strato switch, Slimline light switch, LED downlight and Infrascan Indoor Motion Sensor show their versatility, equally at home in a seaside retreat scheme or as a contemporary modern design.

NEUTRALS

Don't let speakers and switches take over your family or media room. Style them for a bold, high-end feel or for a softer environment, look to neutrals for a more pared back design.

PATTERNS AND PRINTS

The versatility of Saturn switches and LED downlights means you can work with a pattern on print approach or tone it down for a soft hued home.
