

LINN

**Komponent
loudspeaker system.**

‘For about four or five years now, people have been asking me for an affordable loudspeaker system which ticked all of the boxes in terms of performance, in a compact and stylish package. So many loudspeakers look attractive but are actually heavily compromised, either on performance or aesthetics or both. The KOMPONENT system is a tremendously exciting product for us because for anyone who cares about quality, it represents a great combination of performance and style at a price within the reach of most music and film lovers’. Philip Hobbs. Linn’s Senior Acoustic Engineer.

**The Komponent
loudspeaker
system
from Linn.**

Music for life.

You know how much pleasure music brings to your life. It can pick you up. It can calm you down. It can move your feet and stimulate your mind.

Over thirty years ago Linn was born out of a simple realisation; the more accurately a system reproduces sound, the greater the impact it will have on the listener. The better the sound, the greater the benefit. Ever since then, our goal has been to produce music and movie systems capable of delivering the full emotion of a live performance in your home.

The best sound systems can change your life. Only music and movies reproduced above a certain standard can bring you lasting pleasure, so at Linn accurate reproduction always comes first.

Why Linn loudspeakers are so special.

How well a loudspeaker performs depends entirely on the way it's made. A Linn loudspeaker is acoustically designed with a strong, rigid and stable construction, to avoid the unwanted movements or vibrations which often affect the sound you hear. Accurate sound, superb engineering, quality materials, solid build and attention to detail, all make a Linn loudspeaker special.

The performance of a Linn loudspeaker can also be improved step-by-step, so wherever you start you can build the best system through simple, cleverly designed upgrades. The combination of original design, unrivalled build quality and simple upgrade options enables you to enjoy your music and movies through a Linn loudspeaker system over a long and cherished product life.

Amazing looks and exceptional sound.

KOMPONENT is a high-performance, precision engineered alternative to mass-market surround-sound systems. It delivers authentic Linn values in a simple and stylish package through advanced technology and design.

Linn's unique 2K Driver Array is an evolution of the array technology found in all of Linn's highest performing loudspeakers including KOMRI, ARTIKULAT and AKURATE.

The 2K Driver Array creates a wonderfully pure high-frequency performance and allows greater flexibility when positioning KOMPONENT loudspeakers in your room.

Throughout the KOMONENT range, aluminium cabinets are used to maximise the internal volume of the loudspeakers. This enables optimum audio performance from a loudspeaker similar in depth to a plasma or LCD screen.

This advanced cabinet design has a number of advantages over traditional, wooden cabinet construction:

- The material is more durable.
- The single piece structure means no glued joints, therefore greater rigidity.
- Loudspeaker cables can be concealed within the structure of the cabinet, avoiding unsightly cables in your room.
- The slim design makes them ideal to position next to a plasma or LCD screen.
- The stands are cast-iron for added stability.

So compact, so versatile.

The KOMONENT range consists of four stylish, high performance loudspeakers: KOMONENT 110 Floorstander, KOMONENT 104 Compact, KOMONENT 106 Multi-purpose and KOMONENT 120 Bass Reinforcement loudspeaker.

Every aspect of the KOMONENT loudspeaker system has been designed to bring music and movies to life in your home without the need to change the way you live. Positioning the KOMONENT loudspeaker system in your room is simple.

The KOMPONENT 104 Compact loudspeaker can be positioned on a shelf, wall-mounted with the simple bracket supplied (vertical axis rotation) or fitted to the optional stand shown below (3).

The base of each KOMPONENT stand is made from heavy cast-iron. The added weight of the stand ensures greater stability and easy-to-adjust floor-spikes help maximise rigidity when positioning loudspeakers on the floor. Metal discs are available to slot on to the spikes for protection, when positioning on a wooden floor.

The KOMPONENT 106 Multi-purpose loudspeaker can be used as a centre, left or right speaker. It can be placed on the simple stand provided, allowing tilt on a horizontal axis, or wall-mounted using the bracket supplied. It can also be vertically wall-mounted with the 2K Driver Array rotating through 90° to maintain full performance.

The unique design of the KOMPONENT 120 Bass Reinforcement loudspeaker gives you the choice of making it a feature in your room, or tucking it away out of sight. Shallow enough to place under furniture, flexible enough to be fixed to a wall or ceiling. KOMPONENT 120 enhances music and movies with clean, powerful bass.

To avoid your room being spoilt by unsightly cables, the cabinets have been specifically designed to accommodate and conceal all cables, which are easily accessed by removing the rear cover plate.

All speakers come with wall brackets for total flexibility of placement. Each model is available in a choice of Silver or Graphite finishes that won't reflect light from a screen.

1. KOMPONENT 110 Floorstander without grille.
2. KOMPONENT 110 Floorstander with grille.
3. KOMPONENT 104 Compact can be mounted on an optional stand.

KOMPONENT 110, 104 and 106 models are supplied with fabric grilles which attach magnetically to the speaker. These grilles provide further protection for the speakers and give a more discreet appearance.

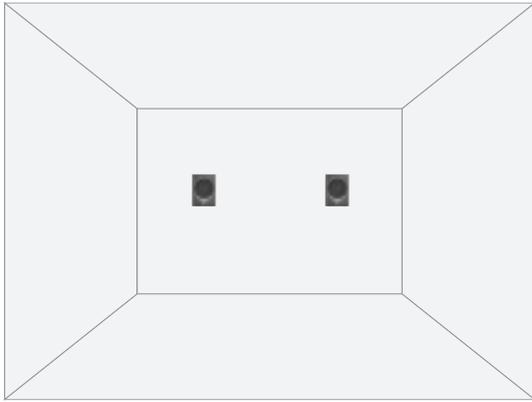

As flexible as you want it to be.

With KOMPONENT you can start small and develop your loudspeaker system over time. You'll be impressed by the 104 Compact speakers on their own. By adding the 120 Bass Reinforcement speaker, you'll be astounded.

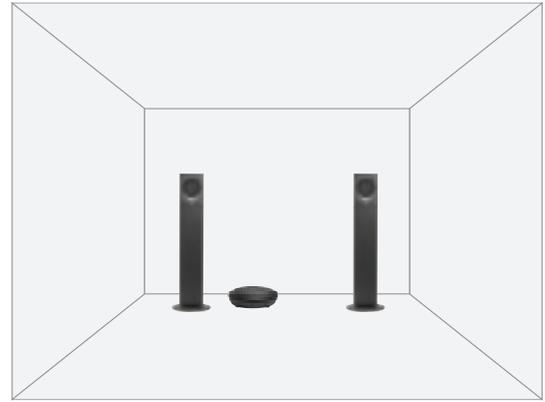

You can build the functionality of your system from stereo to surround-sound in stages to suit you. And you can further improve the performance by gradually upgrading from single-wire to multi-wire, multi-amp or AKTIV, unlocking the full potential of the KOMPONENT system.

There are many configurations to choose from (some are shown opposite) and all are designed to fit seamlessly into your home.

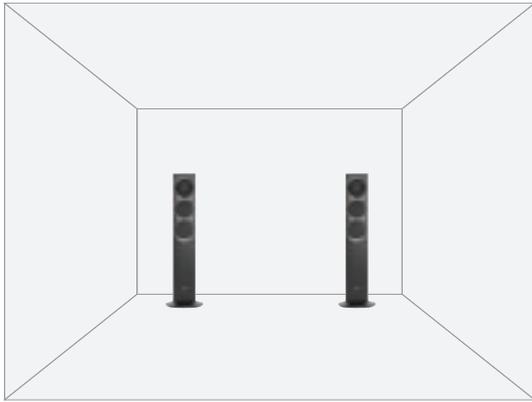

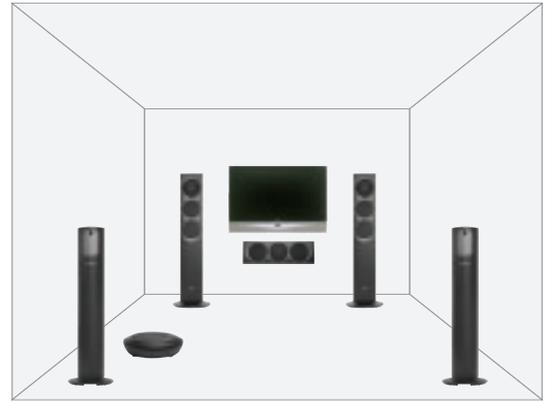

SIMPLE STEREO.
2x KOMPONENT 104 Compact on brackets.

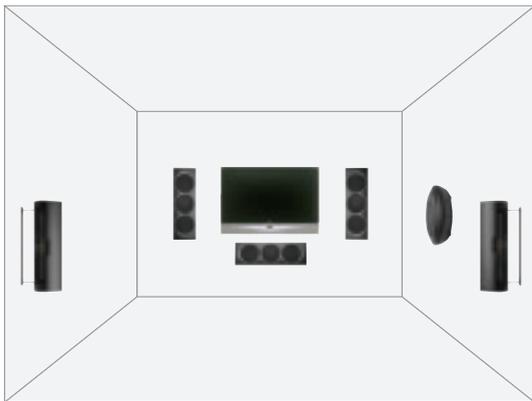

SIMPLE STEREO + SUB. 2x KOMPONENT 104 Compact with stands and 1x KOMPONENT 120 Bass Reinforcement.

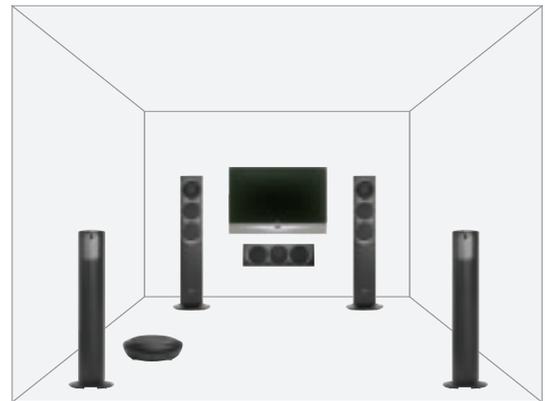

PERFORMANCE STEREO.
2x KOMPONENT 110 Floorstander.

5.1 SURROUND SOUND. 2x KOMPONENT 110 Floorstander, 2x KOMPONENT 104 Compact, 1x KOMPONENT 106 Multi-purpose and 1x KOMPONENT 120 Bass Reinforcement.

ON-WALL 5.1 SURROUND SOUND. 5x KOMPONENT 106 Multi-purpose and 1x KOMPONENT 120 Bass Reinforcement.

PERFORMANCE 5.1 SURROUND SOUND. 4x KOMPONENT 110 Floorstander, 1x KOMPONENT 106 Multi-purpose and 1x KOMPONENT 120 Bass Reinforcement.

Linn systems are simply better.

A Linn system is built to last. Linn's philosophy of making systems that are modular, expandable and upgradeable ensures you can develop your system over a lifetime, improving its functionality and performance.

Because Linn believe in being true to the music, the focus has always been in developing systems that reproduce sound as faithfully as possible to the original recording. Over the decades our experience has given us a clear understanding of how sound travels from recording to loudspeakers, and an appreciation that the sound reproduction process is only as strong as its weakest link.

All Linn products are designed to deliver exceptional audio performance, ensuring each and every component in a full Linn system work together in perfect harmony to bring you the ultimate music and movie experience.

Listen for yourself.

Choosing a good system isn't anything to do with specifications or complicated feature lists. It's about listening and watching. Linn has always believed the best way to select a system is through product demonstration and comparison. Our advice to customers has always been simple: if it sounds better, it is better. Compare the products you're considering with an open mind and buy the one that you believe offers the best sound and picture quality. That way, whichever system you choose, you'll know you've made your choice for the right reason. It's Simply Better.

Listen to KOMPLEMENT and compare it with other similar systems to hear the difference for yourself. Your Linn retailer will happily arrange a product demonstration in store or, in some cases, in your home.
